JG: As well, we now have a message from the Archangel Michael so if you will wait one moment he will return with the message.

I call upon the light angels from all upon high to come forth and surround and protect this land - to come forth and surround and protect this home - to come forth and surround and protect these people. Bring forth the divine light and guide the holy spirit ever present and manifest the light within.

My bretheren, as I come to you today, I come speaking these words of wisdom that you might yet understand the greater truth with a greater clarity. Some years ago, I began to focus a light upon the earth, a light that now serves as the foundation focus. Let me explain a little bit about how this comes about and why it now serves the focus it does. I am not at the highest point in evolution

but I serve a point in the evolving light. And as the great God, the True One, thinks a thought, that thought goes forth out into the spiritual universe, seeking manifestation at some level of his reality. As that thought goes forth, it goes through many who have become realized within God at some level or another, and in that realization that thought comes forth within an individual who perceives the thought of God and looks for a way to manifest that thought so that that thought can come into full creation - and through full creation an understanding of God itself is manifested within. And so the thoughts that I try to promote through you and others like you have come yet from higher sources above me, and as I take the energy from on high, as it is presented to me, I step it down so that you here can begin to understand that which God Himself has ordained, so that his will might be better fulfilled in this level of the universe. And so, as I step down the energy that has been passed on from on high unto me, I step the energy of light down to you in a focus of clarity so that you can then go forth and manifest it according to your free choice and will, always focusing^{though} upon the free will within that is God. This is why the

foundation came into focus. This focus came into being in 1900 at the turn of the century, that is when this idea was first presented to me and since then we have worked at trying to bring about a clarity of ideas, and how to bring about the organization so that it can serve man to its fullest. We have created many different types of organizations up to this point that have served in some way to fulfill this mission. But they have been steppingstones and sometimes we have tripped and sometimes we have learned from that tripping or from those mistakes what to do and not to do within an organization. And so it has come to pass now that the John Fetzer Foundation has been formed and it serves as a great focus of the truth that God wishes to understand within Himself. Likewise, the Institute of Inner Light is an organization which is similar in structure to none other on earth. Because up until this time it truly has not

existed in this form. Other organizations may reflect somewhat the character and traits that we are presenting within III, but not the clarity of those traits nor the clarity of the light that is focused within. In such an organization as we are trying to develop within III today will lead yet to greater and greater focuses of light upon the earth in the future. For those mistakes we learn from, as you make them and as we make them in focusing the light toward you, we will learn and be able to make a clear channel of light within the future either within III or within another organization. So the III organization will serve as another focus, as another point of clarity and expression of the true God within.

And now I have been asked to give this understanding of the three levels that we have been discussing up to now. As you set up the funding project, the educational project, and the project of service - set up the monies in such a way that they are split in three different manners within the Institute. Do not put all the monies that are available each year into the funding project because then in time when it comes to developing the educational system or comes to developing more the cities of life or the centers of life or the levels of service, whatever develops - there would not be the money available because it will all have been projected toward the funding project. Rather, pre-determine a section of monies for the funding, a section of monies for the educational level, and a section of monies for service. And try to keep them

somewhat separate. True, some of the monies can intermingle back and forth as needed, but try to keep them somewhat separate so there will always be funding available for each of these projects - each of these fingers within the Institute itself. And then let each of the fingers give back into the Institute enough money to help pay so that the organization will have the professionals needed and the funding needed to pay for the services such as a building or whatever will be needed in the future. These things as you come into clarity

with them, you will understand better and truly you have the organizational minds and the physical understanding of business to go about setting up such a project as this. We will try to give you the clarity as best we can. And then in the processing of developing, and even after the developmental process has been done, we will come if you ask questions concerning this and try to do our best to give clarity to that which you have questioned. But we do rely a great deal on your knowing as well. That is why we have come to you and not to someone else. For you have the knowing of this world and its mechanisms.

Also, concerning the project of service. You might look at the people you have met yesterday in Phoenix and look at some of the projects that they have begun and the level of service. And you might see here the beginning levels of the service departments that could be expanded upon. There is a great deal of knowledge concerning child rearing and how to bring forth a better condition of love, truth and harmony within family life through the processes that they have already started. Through the educational system much of this knowledge could be put forth for many to learn from. Also, within the service a new form of child rearing such as day care centers and educational systems for parents could be developed in the future. This is not the ultimate but this is a step toward the ultimate. And there is a great deal of truth here to be gleaned if you will look, talk to the people who are involved and if they are interested, get them more involved in developing a true program in this area. As well, within the Rudolf Steiner and the New Age school systems, there is a lot of information available that could be utilized in developing this part of

the organization. So, a lot of the information is already made available. It is a matter of pulling together and pooling together all of the information and taking the best of that quality material and putting it to functional use within this daily life.

BF: Thank you. One last question. We asked earlier about George Meek and you indicated at that time that it did not concern the Council. If we were to ask about George Meek's activities right now, would the Council be adjourned?

No, the Council has taken this to heart and has an answer concerning this. Even though it does not really have a lot to do with that which is unfolding at this moment, it still does inner link with the foundation's activities. And so we chose to vote it into Council function so that we can continue our activities and work with you through to the end. The end of the time this week that we will be with you. So, at this time, let us present an understanding of that which is taking place. To do this, we bring in another word - another understanding voice. I will speak Cato for this individual, for where his energy is coming from - it is of a lower nature than of the soul realm at this time. And it would be difficult to express through this vehicle safely and maintain a high focus. So I will express for this individual as they are presented before the Council Chambers.

These words now come from that whom you know as Abraham Lincoln. As I served as the President of the United States many years ago I sought within my heart to fulfill the will of God and the plan that was laid forth in the founding of these United States. I sought, at that time, to keep this nation united under one God and in the divine will that he had laid forth for it. I seek today to help maintain that unity so that it may prevail and that all mankind eventually might know the unity that is God within themselves. But first they must know

the freedom before they may know the liberation in God. And so I have sought in many ways to help maintain a state of freedom in the physical planes of Earth. And so I work diligently to help keep the United States united and free. And now a group of us have come together and we are working diligently on the inner planes of light and love to help maintain that state of freedom - to help maintain the unity that must prevail against those that wish harm and destruction that leads to freedom. If that freedom cannot be maintained within the United States, then truly the greater freedom - the soul liberation cannot be known to many that need to know it at this time. We have yet a greater vision to present to the world and that is a united world, a united humanity. And now we strive to instill within the hearts of many throughout the world this vision of a united world. This vision was begun many years ago with the League of Nations and thereto many of us from this side of life worked to bring it into the vision of many. And then later we worked to bring forth the United Nations. And through the failures and through the successes that we have had in working at this level with people in that world of the physical, we have learned now how to go about implanting the vision of a united world, of a united humanity. And so many of us have come together upon these planes of life to work to bring about this vision. Again, we are bringing together many different minds with many different levels of knowledge and understanding to bring about a balance within the world. As you are striving to bring about a balance within the individual within the physical, emotional, mental and spiritual levels of oneself, we have united a Council together of those who can help bring about a balance of the physical, emotional, mental, political, and spiritual lives of mankind. As we are laying down the formats today at this time the plans of uniting the world in the future, of bringing about a united world, a united kingdom of man. And eventually this will come about. For truly it is the

desire within God's heart. And what God desires comes to pass. But he gives each part of himself the right to choose in its own time the fulfillment of that desire. And so we realize that many upon the Earth today will choose not to participate in these activities of unity. But as we begin to present this light of truth to the hearts and minds of many, you will see a stronger desire in many for peace, for harmony and balance within the governmental systems, within the political systems that rule mankind today, as well as within the scientific and religious communities. And eventually the desire within God's heart shall come forth. It will take time, but time we have. Many upon the face of the Earth today must leave the physical realms and depart before this can come to pass. Just as in the days of old as Moses led the Israelites out of Egypt and toward the promised land, they wandered for forty years throughout the desert waiting for the old minds and hearts to die so that the new vision within the new people could prevail. So this our role and function at this time, to implant the new vision, to implant that new vision in the new people that are coming forward daily. And as they come forward, we wait for the old to die off so that truly the new can be brought forth. And the light can come forth and prevail. When you strike a match in a dark room, that light begins to shatter the darkness until darkness is no more. And so it is, the light we are implanting in the hearts and minds of these people that hold up this new spark, this new match of the desire of God for unity is beginning to shed the light in the darkness. And eventually the darkness shall be no more.

At this time we trust that this gives you a picture of that which we are trying to accomplish. We work from a plane of existence that is not as high as this Board that I stand before today. And I am honored to present this knowledge to you here in this manner. For truly I see now for the greater vision within our hearts has come and it brings me great joy to go back and

share with those in my Council that great knowledge that I have found today in the hearts of these souls that I have touched and that have touched me. As you go forth to fulfill the mission that has been given to you through these great souls and this chamber here, know that we, too, are working to fulfill a mission that they have given to us. And together you and I and my Council within the planes surrounding the Earth shall truly work together striving to fulfill these missions that have been given to us knowing now that it is in the heart of God that these missions have come forth from. It is a great responsibility but it brings great joy in knowing that we are playing apart in the unfoldment of God's will.

JEF: Is it appropriate to ask a question?

At this time I must receive permission, if you will wait one moment. If you wish you may ask a question.

JEF: I wonder if President Lincoln could tell us who some of the leaderships are that resides in his Council.

The names have been given through your sources.

JEF: Then those sources are correct as we have them?

Yes, for the most part they are correct.

JEF: I feel deeply touched as a result of this having been in the line of one of the former President's in another country. I am delighted to know that these men of talent and understanding and vision have organized under

our great President and as far as the foundation is concerned, if the heirarchy that is directing us wishes us to participate in this great function, we feel compelled to lay our services at your command. We want to help and we are greatly touched the fact, President Lincoln, that you have come to us today. God bless you in your work and your endeavor. For we are all very, very kindred spirits.

-

Know that we work together upon a mission. A mission of great light and truth. But our missions are different and are not so interlinking. Your mission is towards the individual man - to bring health and balance so that he may find the path to the God within. Our mission is to the outer - to bring a balance to those who still need to find a level of freedom within the physical before they are prepared to go within and find the liberation within the inner. At some future date, if there is something that we need through you, it will come forth and likewise we know know that if there is something that our Council can do to aid in your work that it shall come to pass. Know that we serve in the light of God and in that light of God we serve together - even though our paths may be different in serving. Even though it seems our goals are different, truly the goal is one and that is the will of God.

I leave at this time, for it is time that I return back with that which I have received to give to those in my Council Chamber.

Now to continue the work. I came here only because I was asked by this Council to do so. But now it is time that I return to that which I must do as well. In the light of God and in the service of God together we join and in joining together in service we are one. And in that oneness we shall find fulfillment and in fulfillment God shall be in the hearts and minds of all and he shall prevail for he is all in one. And so now you have heard the words of Abraham Lincoln and you have heard the knowledge that he has to share with you. We trust that this gives you an understanding of that which is being done at different levels around the world today, and you see now that our Council does not work just one little project, one aspect or a few people. We work with all who wish to be of service. Many upon the Council Chamber today are embodied just as you here are embodied, giving physical service to the world as well. But they also serve from their soul awareness levels as well, giving truth and guidance in their own way, in their own time, in their own place in service of God.

JEF: I would assume that our desire to support George Meek then is a matter of continuation from our stand point, from your stand point?

Yes. If you will read that which again you have discussed today, you will find that his projects help to begin fulfilling one aspect that we laid down so many years ago.

JEF: Right.

From there, great expansion will come forth eventually. But this is a beginning and that is all we seek at this time is a beginning, and it is a good one.
